Summary

Computer Science Engineering student with strong problem-solving skills and hands-on experience in full-stack web development using the MERN stack, REST APIs, and scalable web applications.

Good understanding of Data Structures & Algorithms, OOPs, DBMS, and Computer Networks with experience building real-time and project-based software solutions.

Education

2023 – Present	B.E. in Computer Science Engineering, Chitkara University	8.9/10
2020 – 2022	Class XII – BSEB	78.2%
2019 – 2020	Class X – BSEB	93.4%

Projects

BSEB-Pathsala |

- Developed a full-stack educational platform for BSEB students of classes 8–12 with structured subject-wise learning resources.
- Implemented reusable React components and mobile-first UI for better accessibility across devices.
- Structured content class-wise and subject-wise with scalable architecture to easily add new resources and subjects.
- **Tech Stack:** React, Nodejs, Expressjs, MongoDB Atlas, vercel, Render
- **Live link:** <https://bsebpathsala.vercel.app>

CodeQuick |

- Developed a full-stack coding platform supporting multi-language code execution and real-time output rendering.
- Integrated Judge0 API to compile and execute user code securely across multiple programming languages.
- Created an admin dashboard to add and manage coding problems with test cases and difficulty levels.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, REST APIs, Monaco Editor, Judge0 API
- **Live link:** <https://codequick-v2-rhha.onrender.com>

Technical Skills

- **Programming:** C++, Java, JavaScript
- **Core CS:** Data Structures & Algorithms, DBMS, OOPs
- **Backend & APIs:** Nodejs, Express.js, API Design, MySQL
- **Frontend:** React, JavaScript, HTML5, CSS3
- **Tools & Testing:** Git, GitHub, Postman

Activities & Achievements

- Solved **200+ Data Structures and Algorithms** problems on LeetCode and GeeksforGeeks.
- Completed Certified Courses in HTML, CSS, and JavaScript on Infosys Springboard.
